It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

**In the claims:**

Column 16, After claim 22, line 43, please insert the following claims 23-27:

- 23. *A dental implant for insertion in the jaw bone of a patient, comprising:  
an elongated body having a longitudinal axis and an axial hole, said body  
having a proximal surface generally transverse to said longitudinal axis,  
a boss extending from said proximal surface, said boss having a transverse  
face, generally axially extended side surfaces, and a polygonal cross section as viewed  
along said axis, and  
opposing slots penetrating said transverse face of said boss, said slots being of  
substantially equal width and mutually aligned with one another.*
24. *A dental implant as in claim 23, wherein the end of said elongated body having  
said proximal surface is enlarged relative to the rest of said elongated body.*
25. *A dental implant as in claim 24, wherein said elongated body is substantially  
cylindrical, and includes a screw thread circumscribing its exterior.*
26. *A dental implant as in claim 25, wherein said polygonal cross section is a regular  
polygon having sides of equal length.*
27. *A dental implant as in claim 26, wherein said regular polygon is a square.--.*

This certificate supersedes the Certificate of Correction issued December 1, 2009.
